DETAILED ACTION

EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Mr. John Learman on February 7, 2005.

The application has been amended as follows:

IN THE SPECIFICATION:

On page 1, line 2 of the Specification, the phrase --, now Patent No. 6,742,792, which claims priority of provisional patent application Serial No. 60/315,561, filed Aug. 29, 2001.-- has been added to the end of the sentence.

IN THE CLAIMS:

In claim 1, line 17, the word "cover" has been deleted and replaced with the phrase --fabric member--.

In claim 2, line 8, the phrase --front and rear rail-- has been added before the word "structures".

In claim 2, line 11, the word "structures" has been deleted and replaced with the word --portions--.

In claim 2, line 16, the word --fabric-- has been added before the word "cover".

Art Unit: 3618

In claim 2, line 17, the phrase --looped around said side rail portions-- has been added at the end of the sentence.

Allowable Subject Matter

2. Claims 1-2 are allowed over the prior art.

3. The following is an examiner's statement of reasons for allowance: In the Examiner's opinion, a merchandise cart having a base platform, front and rear inversely U-shaped rail structures having top rail portions and side rail portions fixed to the front and rear ends of the platform and having vertically spaced cross rails spanning the side rail portions, which have vertically spaced apart side straps looped around the side rail structures and correlating with said cross rails to lie upon and be supported by said cross rails and having couplers on the free ends, a unitary flexible fabric cover secured to said front and rear rail structures draped in inversely U-shaped configuration to provide a top wall and side walls between the front and rear rail structures and having mating cover straps carrying mating couplers secured to project from said side walls of said cover in vertically spaced relation correlating with said cross rails to couple with said couplers on said side straps was not anticipated by the prior art, nor would it have been obvious to a person of ordinary skill in this art. The prior art in Guggenheim (US Patent 4,948,154) discloses a cart having a base platform and front and rear inversely U-shaped rail structures with a flexible fabric cover draped over the rail structures of the cart. The cover is made up of several portions that are attached to each other with a hook and loop fastener, but does not disclose directly coupling the cover to the rail structures of the cart, only securing the cover around the rail structures. Guggenheim does not disclose correlating couplers secured to

project from said side walls of said cover and from side straps looped around and supported by the cross rails. Vorstenbosch (US Patent 5,875,904) also discloses a cart having a base platform and front and rear rail structures with a cover that wraps around the outside of the rail structures of the cart. The cover is rolled out and has a clip on the end of the cover that affixes to a channel in the rail structure. However, Vortenbosch does not teach the correlating couplers to attach the cover to the rail structures, nor does it teach draping the cover in an inversely U-shaped configuration to provide a top wall and sidewalls. Finally, Schrecongost (US Patent 5,255,765) discloses a cover for a piece of luggage that has mating couplers that attach one end of the cover to the corresponding other end in order to secure the cover around the luggage. However, Schrecongost does not provide motivation to substitute the couplers used on the cover to secure to itself for the fastening method disclosed in either Guggenheim or Vortenbosch, nor does Schrecongost provide the limitations lacking in the two previous references.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
